SAFIS-3/Maj Tacker/jmd/74966/22 Feb 58

24 February 1958

Dear Mr. [REDACTED]

Your letter of 2 January 1958 addressed to the Weather Records Processing Center in San Francisco has been referred to this office for reply.

From your description the sighting you observed on 22 December 1957 was a fireball or bolide. The coloring (greenish white) and other characteristics attest to this conclusion, and there were similar sightings of bolides in that area last year.

Thank you for your detailed report. Your interest in this subject is appreciated.

Sincerely,

LAWRENCE J. TACKER
Major, USAF
Executive Officer
Public Information Division
Office of Information Services

Mr. [REDACTED]

California

December 7 and 1958 we had one inch of snow between four and six inches. The ground had little traction since the surface was soft and slippery. To go to feed the bulls, we saw a bob cat, and as we looked for it, we saw a place where it was difficult to get out. It was very dark by the time we got home, but the kids went back to the snow to look for it. It seemed that they were gone an unusual time and we were worried about them, and watched for them.

I was looking west, by a trifle north, when I saw the pickup 11-15
and I watched them until they got to the gate just west of the gate
and I got out to open the gate---the time within five minutes
in the evening. (Time-creation of possibility, Day 1)

... of fire appear just above the horizon. It was over a shed, a quarter of a mile away. It was there, she did not wish to be accused of. When she came in the house (13 years old) she was a little under--pretty much kidding about it. The size of a fifty gallon barrel, and it was a ball, probably a ball, slightly northwest of where she stood. As soon as it appeared, just over the shed with the pickup lights, slightly reddish white, it was a very light greenish white indicating a fire. *Clues: Typical "Endall" "channeling"* It rained a great deal in the winter, but it did not rain when this mass hit the earth, but we have told you that it seemed to hit the earth, so it was the Honey said it hit behind a nearby hill. At the gate, the pickup motor was running quietly, but no additional noise, which might indicate a fire. As I had estimated.

for the fact that we both saw this morning
I not report this incident. I was told
and.

...again spotlight, the following day, around 11:00 AM. The ship was cruising over the area. He saw the ship at that incident, other than the fact that it was a ship. If this incident, we would be glad to have you, and wishing you a good new year, is all.
